

# Firematic RALLY

## THE RALLY

The Firematic Rally is the most compact version in our expanded truck line. For the tightest spaces and the most remote places, this powerful little go-getter brings capability where you need it, and takes you where others can't reach. Our fully-engineered and time-proven modifications strengthen the vehicle, providing better protection without having an adverse affect on maneuverability. Strength and agility are a rare combination, but Firematic has brought them together right here in this truck.
